Anggar Pujianto

Software Developer · React, Java Spring Boot

Jakarta, Indonesia | anggarpujianto3@gmail.com | linkedin.com/in/anggar-pujianto-511569275 | anggaaaaaaaaaaar.github.io/portfolio

SUMMARY

Software developer with 6 years of experience, mostly in financial services. I currently work on both ends of Avantrade, a wealth management platform: Spring Boot services and REST APIs on the backend, React on the frontend, plus CI/CD and production support. I shipped its eKYC onboarding and digital wallet payment module.

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Redux Toolkit, Tailwind CSS, Ant Design
Backend: Java, Spring Boot, REST API, Go, Oracle Database
DevOps: Docker, Jenkins, GitLab CI/CD, deployment, log monitoring
Other: Technical specification writing, code review, test planning, Agile

EXPERIENCE

Product Specialist, PT Indivara Group Jul 2024 – Present

Jakarta · Avantrade wealth management system for financial institutions

- Delivered eKYC (electronic Know Your Customer), speeding up user onboarding and reducing manual verification work for the operations team.
- Built the payment module with digital wallet integration, designed so new wallet providers plug in with minimal code changes.
- Developed and maintained Spring Boot services and REST APIs that connect multiple internal systems.
- Built responsive React interfaces for the client-facing application.
- Set up CI/CD with Jenkins and GitLab CI, and automated data and system migrations.
- Wrote technical specifications and worked with business, operations and engineering teams to scope features.

Frontend Developer, PT Indivara Group Apr 2023 – Jan 2024

Jakarta · Avantrade

- Built the Avantrade frontend from scratch with React, TypeScript, Redux Toolkit and Tailwind CSS.
- Defined application flows with business analysts; reviewed code and wrote onboarding docs for new developers.
- Integrated backend APIs and helped the backend team build endpoints in Spring Boot.

Frontend Developer (Part-time), Sagara Technology Oct 2020 – Aug 2023

Contract projects for clients in banking, finance and food manufacturing

- **Bahana Sekuritas** (Dec 2022 – Aug 2023): built an internal investment and profit-and-loss projection tool from scratch with React, Redux Toolkit and Ant Design.
- **Agrinesia Raya** (Feb – Aug 2022): built an online cake shop with nearest-store search and delivery integration in Next.js, using SSR and static generation for performance and SEO.
- **RUMA / Mapan** (Sep 2021 – Jan 2022): built two apps from scratch, a PPOB customer webview and an admin dashboard, including Android native permissions and AppsFlyer.
- **Bank Rakyat Indonesia** (Oct 2020 – May 2021): built and later revamped PasarID, a market delivery site with Google Maps location and courier tracking.

Software QA Tester, PT Enigma Cipta Humanika Feb 2021 – Feb 2023

Jakarta · placed at PT Mekar Investama Sampoerna

- Wrote test plans, test cases and test scripts; logged and tracked defects through to resolution with developers.

EDUCATION

Bachelor of Information Systems, Universitas AMIKOM Yogyakarta 2015 – 2019

GPA 3.49/4.00 · Thesis: offline Android game built in Unity
Training: Full Stack Programming, Enigmacamp (2020) · Cloud Computing, Digital Talent Scholarship by Kominfo (2020)
